Week 1 Problem Project Proposal: CampusBook

SE2 Group Project | Group 3 | CTU Training Solutions

CampusBook is a web system where lecturers publish their consultation times and students book change or cancel a slot with reminders for both sides

Selected Group Lead

Role	Name and student number
Group Lead	Willem Gerber
Members	Willem Gerber, Oscar Khumalo, Thomas du Plessis, Lebohang Tlaitlai, Gerhardus van den Berg
GitHub repository	https://github.com/Gerber-W/SPM_Group_Project

Problem Statement & Context

At CTU Training Solutions students who need help from a lecturer have no single reliable way to book a consultation They rely on emails, WhatsApp messages or arriving at an office during posted hours which often leads to long waits missed meetings or no reply

Lecturers face the opposite problem Requests arrive through several channels they cannot see who is coming or why and there is no record of who was helped the pressure is highest before tests and assignment deadlines

CampusBook gives both sides one place to manage consultations Its six must-have features are:

1. Login with separate student and lecturer roles
2. Lecturers publish weekly consultation slots
3. Students book change or cancel a slot with a reason for the visit
4. Email reminders before each booking
5. Booking history for students and lecturers
6. Mobile friendly design

Out of scope: video calls integration with CTU live systems and a native mobile app

Target Stakeholders

Stakeholder	Role	What they need
Students	Primary user	Book help quickly and know the meeting is confirmed
Lecturers	Primary user	Control their available times and see who is coming and why
Campus management	Secondary	See how consultation time is used across modules
CTU IT support	Support	A secure system that is easy to host and maintain
Module lecturer	Project client	A working system and dissertation that meet the brief

Proposed Methodology

We will use Agile Scrum with one-week sprints Our deadlines are weekly the team has five members, and weekly feedback may change our requirements so short cycles suit us better than a fixed Waterfall plan

- **Product backlog:** the six features above, written as user stories and ranked by priority
- **Sprints:** one week each ending with a working increment and that week's deliverable
- **Stand ups:** short check ins twice a week in class and on Teams
- **Tools:** GitHub for code and version control, GitHub Projects as our task board
- **Review and retrospective:** a demo at the end of each sprint then we adjust the backlog

In line with industry requirements, CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (only selected registered campuses) (No 2014/HE07/004).
